LEVITATION and the FFU Hypothesis

[REDACTED]@cse-cst.gc.ca

What is LEVITATION?

- A behaviour-based target discovery project
- Multi-disciplinary team
- Prototyping and delivering advances in:
 - Behavioural tradecraft
 - Hypothesis tradecraft
 - Tradecraft automation

Current Hypotheses

Active

FFU

Sequential numbers

Obvious selector names

Web search terms

In Development

GPS waypoints

Devices close to places

Telephony gaps

Targets of foreign SIGINT agencies

Missed calls

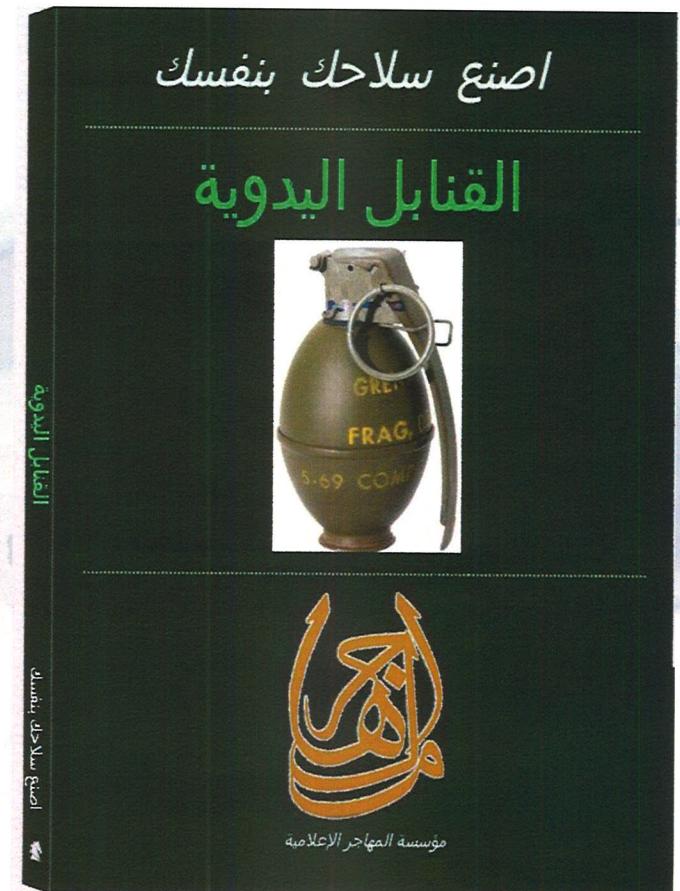

FFU Hypothesis

Extremists use Free File Upload (FFU) sites differently than the general public.

Al-Qaida uses FFU sites to distribute Jihadist propaganda

Extremists use FFU sites to distribute training materials

What do we need?

A list of suspect documents

A list of FFU URLs referring to those documents

A list of IPs downloading those URLs

New documents are found by CWOC (CSEC Web Operations Centre) retrieval from URLs, so that's the easy part.

New URLs

CSEC's web forums team

2nd Party reports & alerts

Machine Learning

Learning the textual
context for the URLs in
web forums

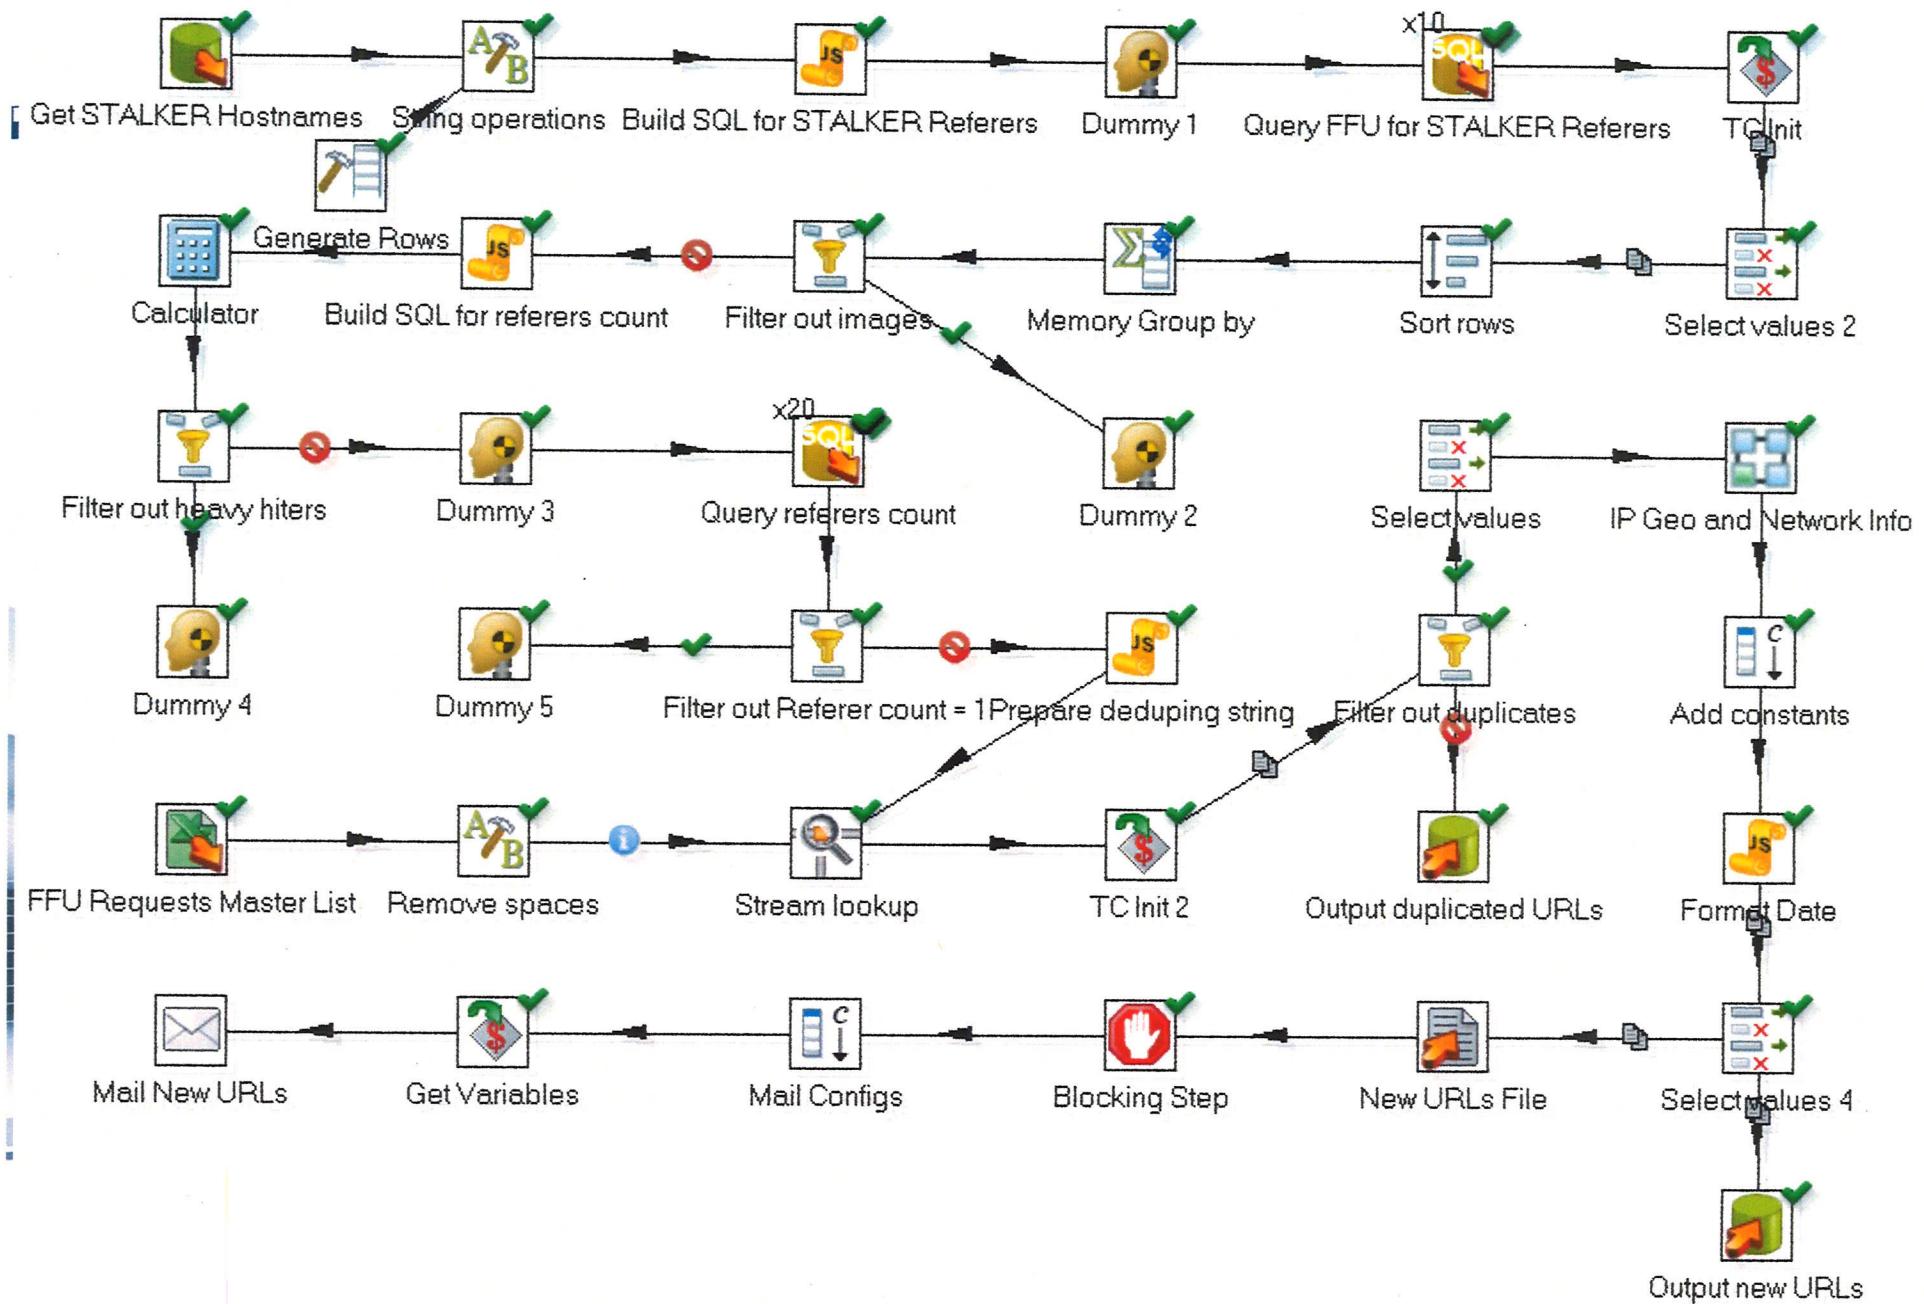

HTTP Referrers

Follow URL referrers back
to the originating site

Previous Correlations
analysis

Using tech techniques to
figure out what else that
user was up to at the
same time

e.g. Google analytics
cookies

TOP SECRET//SI//REL CAN, AUS, GBR, NZL, USA

FFU Events Collection

ATOMIC BANJO (Special Source) is collecting HTTP metadata for 102 known FFU sites.

We see about 10-15 million FFU events per day
All the FFU Events are available thru OLYMPIA

Looking for a few good documents

We only care about the 2,200 URLs
that point to documents of
interest.

e.g. How to make a gas bomb
www.sendspace.com/file/ [REDACTED]

Every day we sort through the 10–
15M events for the interesting
ones.

We're finding about 350 interesting
download events per month.

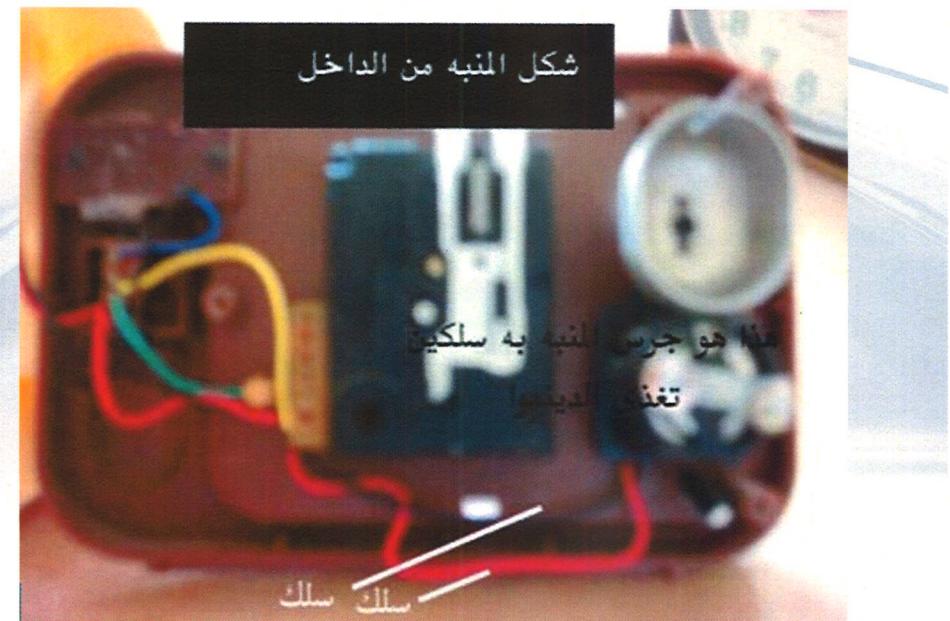

TOP SECRET//SI//REL CAN, AUS, GBR, NZL, USA

Documents vary

Chloroform in a Lowes bucket

Bajadin Explosives Manual

And lots of pictures of cars on fire

Filtering out Glee Episodes

Resulting events

Automated analysis documentation

What happens then?

Compare control and experimental groups to show statistical differences

Analyse experimental group to determine statistical power of the hypothesis

Assemble selectors across all hypotheses

Rank selectors according to the number and power of the hypothesis behaviors they show

Deliver an ordered list of suspects to OCT

Scoreboard

		Hypotheses

Successes

An HTTP-referred URL gave us a German hostage video from a previously unknown target.

An [REDACTED] FFU upload event gave us an AQIM's hostage strategy. The resulting report was disseminated widely including by the CIA to their counterparts overseas.
